

CASE STUDY:

Casino Migrates to Cloud, Sees Significant Reduction in IT Costs

The Client

A large entertainment business offering more than 5,300 slot machines, electronic roulette and craps, a variety of restaurants, live entertainment and a year-round world-class live harness racing and simulcast from the nation's leading racetracks.

This casino ran their financial operations on PeopleSoft and chose to migrate to Oracle cloud with Drivestream to streamline business processes and strengthen internal controls. The migration resulted in a significant reduction of their IT costs, better control over their operations, and optimized spending patterns.

Industry Entertainment

Location North America - USA

Cloud Implementation Highlights

- ✓ Enhanced procurement functionality and nearly eliminated paper-based work and spreadsheet dependency.
- ✓ Streamlined procurement process and made it more cost-effective by leveraging purchase agreements, negotiated pricing, procurement catalogs, workflows, etc.
- ✓ Enabled immediate automated accruals by creating a dedicated warehouse.
- ✓ Provided a user-friendly self-service functionality for managing employee requests.
- ✓ Facilitated greater visibility into spend analytics, optimizing price selection, and reducing overall financial impact.
- ✓ Significantly reduced IT costs with streamlined business processes and deprecation of manual labor.
- ✓ Centralized and strengthened internal controls across key business areas.
- ✓ Enhanced GL accounting operations to achieve better integrations with banks and external institutions.
- ✓ Achieved faster and better self-service reporting using OTBI.
- ✓ Greatly reduced period close cycles.
